EDUCATION

BS Artificial Intelligence

Dawood Univ. of Engineering. & Technology

Oct 2024 – Present

CGPA: 3.65 | LAST SEMESTER GPA: 3.87

Focus: AI & ML | Data Science |
Algorithmic Optimization

Intermediate (pre-engineering)

Liaquat Govt. Girls College

Graduated 2023

Matriculation

SOS Herman Gmeiner H.S. School

Graduated 2021

TECHNICAL SKILLS

Languages: Python (Adv.), C++, Java, SQL

Data Science Tools: Pandas, NumPy, Matplotlib, Seaborn

ML / DL: Scikit-learn, TensorFlow, PyTorch, Keras

Deployment: Flask, FastAPI, Streamlit, Docker

Cloud: AWS, Azure, Google Cloud

AI: EDA, Supervised Learning, Neural Nets

CORE STRENGTHS

- Critical Thinking
- Team Collaboration
- Clear Communication
- Fast Learner
- Adaptability

COURSEWORK

- Introduction to AI
- Programming for AI
- Machine Learning
- Linear Algebra & Calculus
- Data Structures & Algorithms
- Database Systems
- Computer Networks

PROFESSIONAL SUMMARY

AI undergraduate (CGPA 3.65, Lat Sem GPA 3.87) skilled in Python, Machine Learning, and Data Analysis with hands on experience building and deploying ML/NLP models, data dashboards and AI-powered applications end-to-end. Demonstrated expertise through academic projects, competitions, and Microsoft Learn certifications, with a proven ability to apply AI concepts to real-world challenges. Seeking an internship to contribute technical skills, innovative problem-solving, and collaborative energy to impactful AI/ML projects.

TECHNICAL PROJECTS AND DEPLOYMENTS

Chest X Ray-CNN-Temporal-Analysis

- Built a CNN model for pneumonia classification with temporal analysis; **deployed via Streamlit**.

Sentiment Analyzer

- NLP pipeline using Python and Scikit-learn to classify text sentiment with **>85% accuracy**.

Pakistan Socioeconomic Dashboard

- Interactive Streamlit dashboard visualizing socioeconomic indicators; **integrated Pandas + Matplotlib**.

Karachi Watts | Personal Project

- AI Load Shedding Assistant → Chatbot predicting power outages and durations, helping families plan daily routines; built with **Python + ML**.

Al-Bayan | Personal Project

- Quranic Study Companion → Multilingual (Arabic, English, Urdu) app with tafseer chatbot, verse browser, and Groq-powered backend; **deployed with Flask + React**.

Jira To-Do List (Software Engineering Project)

- Designed and documented a project management workflow in Jira; implemented backlog, sprint planning, Kanban board, and bug tracking to demonstrate Agile practices
- Built a CLI-based To-Do List app in Python with full CRUD functionality and persistent JSON storage; wrote 8 pytest unit tests with **100% pass rate**

ACADEMIC PROJECTS

Exploratory Data Analysis & Visualization

- Loaded and preprocessed public housing and healthcare datasets using Pandas and NumPy.
- Built Matplotlib visualizations revealing housing-healthcare correlations, improving predictive accuracy.

Machine Learning Model Implementation

- Developed classification models with Scikit-Learn on datasets of 10k+ samples.
- Evaluated performance using precision, recall, and F1-score metrics.

Relational Database Design & Management

- Optimized SQL queries using indexing and joins to significantly improve performance.
- Reduced retrieval time through efficient storage structure design.

Mathematical Modeling for Neural Networks

- Applied Linear Algebra and Calculus to optimize algorithmic efficiency in neural networks.
- Implemented probability-based logic to enhance predictive modeling performance.

COMPETITIONS & CERTIFICATIONS

LangChain Mysteries — PROCOM'26 | FAST NUCES

- Solved real-world AI tasks including Audio Intelligence (Speech-to-Text), Document Forensics, and AI-powered reasoning using LangChain. Collaborated in a team of 4 under time constraints.

Microsoft 365 Copilot Masterclass | Microsoft Learn | March 2026

- Completed a Masterclass on prompt engineering and AI-powered productivity tools. Earned multiple batches.

Generative AI Tools & Frameworks | AIS, Dawood University | Dec 2024

- Explored the evolving GenAI landscape, modern AI tools, and practical frameworks for Gen-AI development.
